Abstract

The aim of this study was to investigate the role that legislation and management standards might play in ensuring occupational health and wellness in South Africa. The Occupational Health and Safety Act of 1993 determines that an employer must establish and maintain a work environment that is safe and without risk to the health of employees. It seems that there is a lack of guidance in the laws and statutes

with
regard
to
dealing
with
employee
health
and
wellness.
A
management
standards
approach,
which
involves
all the
role
players
in the
regulation
of
employee
health
and
wellness,
should
be
implemented.
