Agric. Econ. – Czech

J. Tvrdoň

Some model approaches of natural resources efficiency evaluation

Agric. Econ. – Czech, 51 (2005): 47-50

The article deals with problems of sustainable development of agriculture from the viewpoint of efficient use of environmental resources. Environmental resources are factors of creation both usual economic goods and stabilization of environment. Analysis proved that classical indicators of economic

performance are necessary to be modified by the ecological threshold of economic activities. However its level is
