The Construction and Application of Personal References
Library Based on

Niu ling (Bozhou Normal College, Anhui 233500)

Abstract: Centralized management of personal references is the difficult problem that research workers must face. Firstly, the paper compares the differences of the current popular research information management softwares such as Reference Manager, Endnote and Pro-Cite, and then takes Reference Manager as a example to dissertate the process of constructing personal references library using manually inputing, importing from online searching and importing from Internet search through indirect methods. After specifying the application methods, the paper points out the deficiency of the reference manager.
