

## Ballistic Deposition on a Planar Strip

Rami Atar, *Technion - Israel Institute of Technology*  
Siva Athreya, *University of British Columbia*  
Min Kang, *Northwestern University*

### Abstract

We consider ballistic diffusion limited aggregation on a finite strip  $[0, L-1]$  times  $Z_+$  in  $Z^2$  for some  $L$  in  $Z_+$ . We provide numerical bounds on the growth in the height process.
