Experimental study on canopy interception using artificial Christmas trees to evaluate evaporation during rainfall and the effects of tree height and thinning

November 21st, 2013

Shigeki Murakami, Tae Toba
Released: November 21, 2013

[Read the rest of this entry »](#)

Monthly adjustment of Global Satellite Mapping of Precipitation (GSMaP) data over the VuGia– ThuBon River Basin in Central Vietnam using an artificial neural network

November 8th, 2013

Thanh Ngo-Duc, Jun Matsumoto, Hideyuki Kamimera, Hoang-Hai Bui
Released: November 08, 2013

[Read the rest of this entry »](#)

Uncertainties of precipitation products and their impacts on runoff estimates through hydrological land surface simulation in Southeast Asia

October 22nd, 2013

Shunji Kotsuki, Kenji Tanaka
Released: October 22, 2013

[Read the rest of this entry »](#)

A monitoring system for mountain glaciers and ice caps using 30 meter resolution satellite data

September 20th, 2013

Kazunari Nakano, Yong Zhang, Yoshihiro Shibuo, Hironori Yabuki, Yukiko Hirabayashi
Released: September 20, 2013

[Read the rest of this entry »](#)

An investigation of extreme daily rainfall in the Mekong River Basin using a gridded precipitation dataset

 September 20th, 2013

Keisuke Ono, So Kazama, Luminda Niroshana Gunawardhana, Koichiro Kuraji
Released: September 20, 2013
