

ABSTRACTS SUBMISSION: DEADLINE MAY 23, 2014

Submit Abstract | View Conference Topics | Register

The **National Capital Region** section of the **American Water Resources Association** would like to welcome you to the **2014 AWRA Annual Water Resources Conference**, in celebration of 50-years of AWRA. The Nation's capital, Washington, DC, will serve as the backdrop for this year's conference. We are planning an exciting week filled with presentations on the latest water resources topics, and providing opportunities for networking and building our professional community.

Fifty Years of Water Resources Management: Where Have We Been, Where are We Going?

The 2014 conference marks AWRA's 50th anniversary. On this auspicious occasion, it is timely to reflect on the state of water resources management in the United States: What was the state of water management when AWRA was formed? How has water management evolved as AWRA has matured into a premier water resources organization? What challenges and opportunities lay ahead for water management, for AWRA, and the water resources profession?

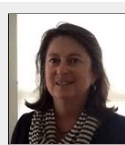

We encourage you to [submit an abstract](#) - there are over **200 topics** to select from. The technical program begins on Monday, November 3, 2014, with a plenary session and continues with concurrent technical sessions on a wide range of water resources research, policy, management, education, and technical topics. A local topic tracks is planned to provide an opportunity for Mid-Atlantic water resource professionals to share with you the Potomac River and Chesapeake Bay experiences. With the conference venue being less than 20 minutes from downtown DC, we are expecting some of the Nation's foremost policy makers to join in the dialogue and interact with practitioners across a wide range of water issues, plans, and solutions from across the nation. This is a perfect opportunity for practitioners and policy makers across the spectrum of the water resources community to share their experiences, learn from one another, and share their outlooks on and visions for the future.

Please join us in creating the depth of technical program that allows us all to take advantage of everything AWRA has to offer- several days of community, conversation, and connections that will benefit all water resource professionals. [Submit an abstract today!](#)
