Dr. George H. Prewitt

Dr. Arthur B. Lewis, Program Chairman

Announcements

The American Diabetes Association at its 25th anniversary meeting urges enlightened citizens to refrain from supporting antivivisectionists. Resolution adopted at this meeting reads:

“Whereas the American Diabetes Association at this meeting is commemorating the 25th anniversary of the discovery of insulin; and whereas insulin has been instrumental in restoring the health and saving the lives of countless human beings suffering from diabetes; and whereas the great work of Banting and Best in discovering insulin, and the subsequent scientific investigations clarifying its actions and uses, would have been impossible without the use of dogs and other domestic animals as experimental subjects; therefore be it resolved that the American Diabetes Association hereby testifies to the value of the use of dogs and other domestic animals for purposes of scientific research; and urges all enlightened citizens to refrain from supporting the misguided efforts of so called antivivisectionists, who constantly try to hamper the advancement of scientific medicine.”
