Abstract: This study was based on specimens of macrofungi collected from Karabük province between 1998 and 2000. It resulted in the identification of 121 taxa belonging to 33 families, and 14 taxa were added to the Turkish mycota flora as new records.

Key Words: Turkish mycota, flora, Karabük, Turkey

Karabük Yüresi Makrofungusları

Özet: Bu çalışma 1998-2000 yılları arasında Karabük yöreninden toplanan mantar örneklerine dayanılarak yapılmıştır. Arazi ve laboratuvar çalışmaları sonucu 33 familyaya ait 121 takson tescil edilmiştir. Bulardan 14 takson Türkiye mikoforasına yeni ilave edilmiştir.

Anahtar Sözcükler: Türkiye mikotası, flora, Karabük, Türkiye

Introduction

This investigation covers only Karabük province, which is located in the Western Black Sea region of Turkey (Figure 1). According to the Flora of Turkey grid system, Karabük is in the grid A4 square (Davis, 1965-1985). The climate of Karabük is of a semi-dry cool type. The annual rainfall average is 475.8 mm and the annual average temperature is 13.2 °C. The rainfall regime is WSAS (Akman, 1990).

The vegetation of the study area is dominated by coniferous and broadleaved trees. Mat (2000) has previously reported some studies carried out in different parts of Turkey. It seems that research around Karabük province is inadequate. The present research was planned not only because of the lack of data from the area but also as an investigation of the effect of climate on vegetation in the growth of macrofungi.

Materials and Methods

Mushroom specimens were collected from the research area during field trips between 1998 and 2000.

The morphological and ecological properties of the specimens were recorded where they were found and their microscopic features determined in the laboratory. They were identified with the help of Phillips (1981), Moser apud Gams (1983), Marchand (1971-1986), Michael et al. (1983-1988), Breitenbach and Kränzlin (1984-1991) and Dähncke (1993). The specimens were prepared as herbarium material and stored in the laboratory of Selçuk University, Education Faculty, Science Education Department.

Results

Fungus specimens collected from the research area are listed below. In the list, A and Y indicate Afyon and Yağız, respectively, as collectors of particular specimens.

Ascomycetes

Helvellaceae

1. *Helvella lacunosa* Afzel.

A4 Safranbolu, Satköy village, near streams, under poplar, 380 m, 25.04.1999, A. Y. 1075.

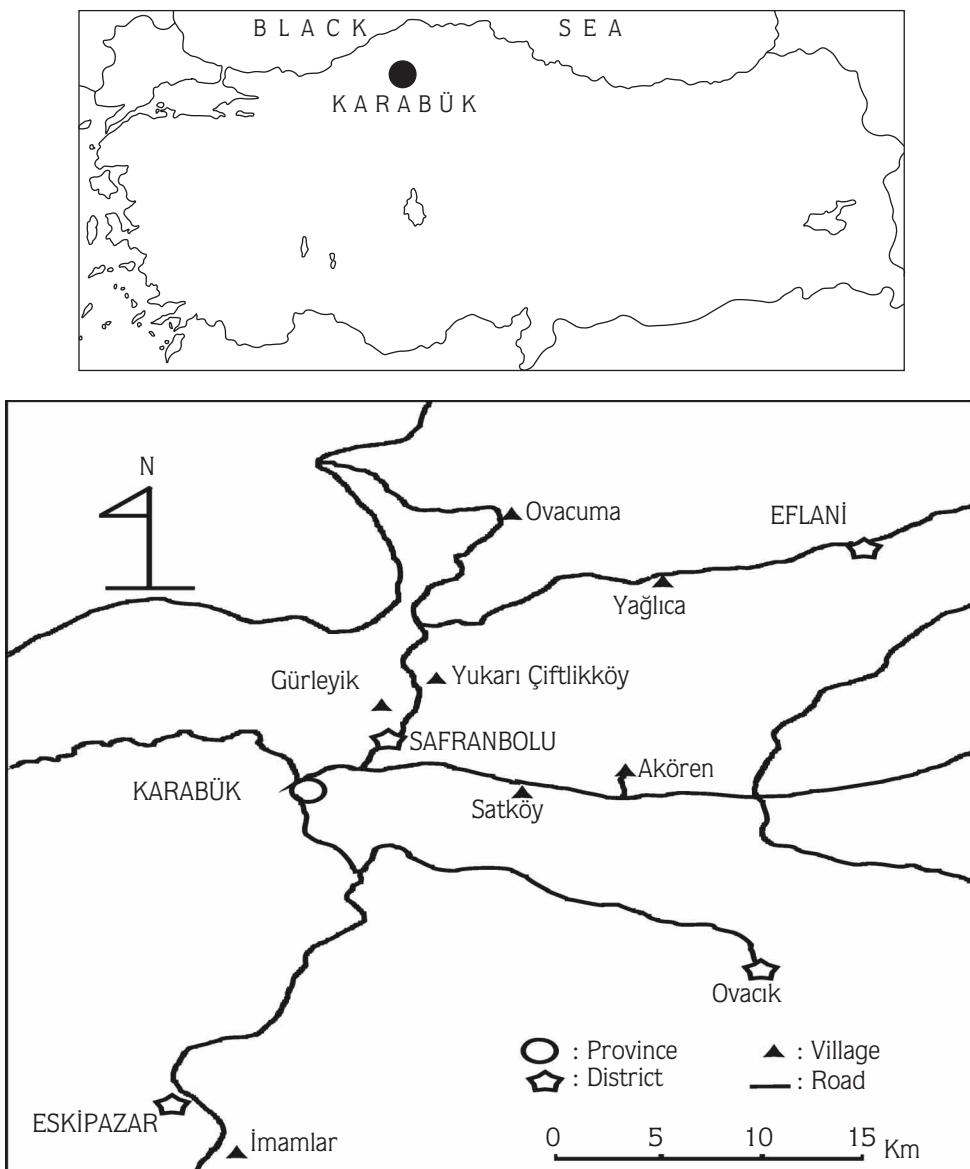

Figure 1. Study area.

2. *Helvella leucopus* Pers.

A4: Safranbolu, Satköy village, near streams, under poplar, 380 m, 23.04.1999, A. Y. 1049.

Morchellaceae

3. *Morchella esculenta* (L.) Pers. var. *esculenta*

A4 Safranbolu, Satköy village, near streams, under poplar, 380 m, 25.04.1999, A. Y. 1072.

Pezizaceae

4. *Caloscypha fulgens* (Pers.) Boud.

A4 Safranbolu, Gürleyik district, under fir trees, 825 m, 22.05.1999, A. Y. 1127.

Peziza vesiculosa

A4 Safranbolu, Gürleyik district, on compost heap, 825 m, 22.05.1999, A. Y. 1128.

Pyronemataceae

6. *Flavoscypha cantharella* (Fr.) Harmaja

A4 Safranbolu, Gürleyik district, under beech trees, 825 m, 27.05.2000, A. Y. 1617.

Basidiomycetes

Agaricaceae

7. *Agaricus bisporus* (J.E.Lange) Pilát

A4 Safranbolu-Bartın highway 16 km along, in grass, 1030 m, 15.11.1998, A. Y. 1029.

8. *Agaricus campestris* L.

A4 Safranbolu-Bartın highway 16 km along, in grass, 1030 m, 15.11.1998, A. 1028.

9. *Agaricus silvicola* (Vittad.) Peck

A4 Safranbolu, Gürleyik district, in grass, 825 m, 15.11.1998, A. 988.

10. *Lepiota cristata* (Bolton) P.Kumm.

A4 Safranbolu-Bartın highway 16 km along, in pastures, 1030 m, 15.11.1998, A. Y. 1044.

11. *Macrolepiota rhacodes* (Vittad.) Singer

A4 Safranbolu-Bartın highway 16 km along, in grass, 1030 m, 15.11.1998, A. Y. 1027.

Albatrellaceae

12. *Albatrellus cristatus* (Schaeff.) Kotl. & Pouzar

A4 Safranbolu, Yukarı Çiftlikköy village, 825 m, under broadleaved trees, 25.10.1998, A. Y. 818; Safranbolu, Gürleyik district, 825 m, 15.11.1998, A. Y. 1014.

Bankeraceae

13. *Hydnellum auratile* (Britzelm.) Maas Geest.

A4 Safranbolu, Yukarı Çiftlikköy village, on soil in coniferous forest, 825 m, 25.10.1998, A. Y. 817.

Bolbitiaceae

14. *Agrocybe vervacti* (Fr.) Singer

A4 Eflani, Yağlıca village, in grass, 880 m, 22.05.1999, A. Y. 1118.

15. *Conocybe tenera* (Schaeff.) Fayod

A4 Safranbolu, Satköy village, near streams, in grass, 380 m, 23.04.1999, A. Y. 1050.

Boletaceae

16. *Leccinum carpini* (R.Schulz) M.M.Moser

A4 Safranbolu, Gürleyik district, in mixed forest, 825 m, 15.11.1998, A. Y. 1017.

17. *Xerocomus subtomentosus* (L.) Fr.

A4 Eskipazar, around İmamlar village, under oak, 950 m, 15.11.1998, A. Y. 945; A4 Safranbolu, Gürleyik district, under broadleaved trees, 825 m, 15.11.1998, A. Y. 963.

Clavariaceae

18. *Clavulinopsis corniculata* (Schaeff.) Corner

A4 Safranbolu, Gürleyik district, in meadows among grasses, 825 m, 15.11.1998, A. Y. 978.

Clavulinaceae

19. *Clavulina cinerea* (Bull.) J.Schröt.

A4 Safranbolu, Gürleyik district, in fir forest, 825 m, 15.11.1998, A. Y. 979.

Coprinaceae

20. *Coprinus comatus* (O.F.Müll.) Gray

A4 Safranbolu, Centre, sandy soil, 300 m, 18.05.1998, A. Y. 413.

21. *Psathyrella candolleana* (Fr.) Maire

A4 Ovacuma, Centre, on or near deciduous trees, 380 m, 22.05.1999, A. Y. 1129.

22. *Psathyrella obtusata* (Fr.) A.H.Sm.

A4 Ovacuma, Centre, on or near deciduous trees, 380 m, 22.05.1999, A. Y. 1130.

Cortinariaceae

23. **Cortinarius cinnamomeoluteus* P.D.Orton

Safranbolu, Yukarı Çiftlikköy village, 825 m, on damp forest soil, 25.10.1998, A. D. 814.

24. **Cortinarius fasciatus* Fr. ss. J.E.Lange

Syn: *Cortinarius fulvescens* Fr.

Safranbolu, Gürleyik district, in coniferous forest, 825 m, 22.05.1999, A. D. 1124.

25. *Cortinarius gentilis* (Fr.) Fr.

A4 Centre, Ovacık highway 5 km along, 380 m, in pine forest, 15.11.1998, A. 958.

26. **Cortinarius herbarum* Rob.Henry

Safranbolu, Gürleyik district, in coniferous forest, 825 m, 15.11.1998, A. D. 1007.

27. *Cortinarius splendens* Rob.Henry

A4 Centre, Ovacık highway 5 km along, 380 m, in mixed forest, 15.11.1998, A. 959; A4 Safranbolu,

Gürleyik district, under broadleaved trees, 825 m, 15.11.1998, A. Y. 966.

28. *Cortinarius subturbinatus* Rob.Henry

A4 Safranbolu-Bartın highway 16 km along, in mixed forest, 1030 m, 15.11.1998, A. Y. 1046.

29. **Dermocybe carpineti* M.M.Moser

Safranbolu, Yukarı Çiftlikköy village, among oak trees, 825 m, 25.10.1998, A. D. 815.

30. **Dermocybe semisanguinea* (Fr.) M.M.Moser

Safranbolu-Bartın highway 16 km along, in coniferous forest, 1030 m, 25.10.1998, A. D. 825.

31. *Hebeloma eburneum* Malençon

A4 Safranbolu, Gürleyik district, under coniferous forest, 825 m, 22.05.1999, A. Y. 1123.

32. *Hebeloma edurum* Métrod ex Bon

A4 Safranbolu, Yukarı Çiftlikköy village, in grassy coniferous forest, 825 m, 25.10.1998, A. Y. 823.

33. *Hebeloma fragilipes* Romagn.

A4 Safranbolu, Gürleyik district, in mixed forest, 825 m, 15.11.1998, A. Y. 1009.

34. *Hebeloma sinapizans* (Fr.) Sacc.

A4 Safranbolu, Gürleyik district, under broadleaved trees, 825 m, 15.11.1998, A. 1008.

35. *Inocybe fastigiata* (Schaeff.) Quél.

A4 Safranbolu-Bartın highway 16 km along, in mixed forest, 1030 m, 25.10.1998, A. 828; Safranbolu, Gürleyik, 825 m, 22.05.1999, A.1125; A4 Eskipazar, around İmamlar village, 1000 m, 28.06.1999, A.1282.

36. *Inocybe geophylla* (Pers.) P.Kumm. var. *violaceae* (Pat.) Sacc.

A4 Safranbolu-Bartın highway 16 km along, in grassy coniferous forest, 1030 m, 15.11.1998, A. Y. 1033.

37. *Inocybe nitidiuscula* (Britzelm.) Lapl.

A4 Centre, Ovacık highway 5 km along, in pine forest, 380 m, 15.11.1998, A. 949.

38. *Inocybe patouillardii* Bres.

A4 Eskipazar, around İmamlar village, under broadleaved trees, 950 m, 17.05.1998, A. 412; Centre, Ovacık highway 5 km along, 380 m, 15.11.1998, A. 948.

39. *Inocybe queletii* Konrad

A4 Centre, Ovacık highway 5 km along, in pine forest, 380 m, 15.11.1998, A. Y. 950.

Entolomataceae

40. *Entoloma saepium* (Nouillef-Dass.) Richon & Roze

A4 Safranbolu, Yukarı Çiftlikköy village, among shrubs, 825 m, 25.10.1998, A. 821.

Ganodermataceae

41. *Ganoderma applanatum* (Pers.) Pat.

A4 Safranbolu, Gürleyik district, parasitic on oak trees, 825 m, 15.11.1998, A. Y. 973.

42. *Ganoderma lucidum* (Curtis) P.Karst.

A4 Safranbolu, Gürleyik district, on roots of broadleaved trees, 825 m, 15.11.1998, A. Y. 974.

Gomphaceae

43. *Clavariadelphus truncatus* (Quél.) Donk

A4 Safranbolu, Gürleyik district, under fir trees, 825 m, 15.11.1998, A. Y. 968.

Gomphidiaceae

44. *Chroogomphus helveticus* (Singer) M.M.Moser

A4 Safranbolu, Gürleyik district, in coniferous forest, 825 m, 15.11.1998, A. Y. 1018.

45. *Chroogomphus rutilus* (Schaeff.) O.K.Mill.

A4 Safranbolu, Yukarı Çiftlikköy village, in coniferous forest, 825 m, 25.10.1998, A. Y. 819; Safranbolu, Gürleyik district, 825 m, 15.11.1998, A. Y. 1019.

Hydnangiaceae

46. *Laccaria laccata* (Scop.) Fr.

A4 Safranbolu, Gürleyik district, under coniferous and broadleaved trees, 825 m, 15.11.1998, A. Y. 1006.

Hymenochataceae

47. *Phellinus tremulae* (Bondartsev) Bondartsev & Borissov

A4 Eskipazar, around İmamlar village, parasitic or saprophytic on oak, 950 m, 15.11.1998, A. Y. 944.

Lycoperdaceae

48. *Calvatia excipuliformis* (Scop.) Perdeck

A4 Safranbolu, Gürleyik district, in pastures, 825 m, 15.11.1998, A. Y. 1011.

49. *Calvatia utriformis* (Bull.) Jaap
A4 Eskipazar, around İmamlar village, in pastures, 1000 m, 28.06.1999, A. Y. 1283.
50. *Lycoperdon perlatum* Pers.
A4 Safranbolu, Gürleyik district, in pastures, 825 m, 15.11.1998, A. Y. 1010.
51. *Lycoperdon pyriforme* Schaeff.
A4 Safranbolu-Bartın highway 16 km along, on dead wood of broadleaved and coniferous trees, 1030 m, 15.11.1998, A. Y. 1045.
52. *Vascellum pratense* (Pers.) Kreisel
A4 Safranbolu-Bartın highway 16 km along, in pastures, 1030 m, 25.10.1998, A. Y. 824.
- Marasmiaceae**
53. *Armillaria mellea* (Vahl.) P.Kumm.
A4 Safranbolu, Gürleyik district, on wood of beech, 825 m, 15.11.1998, A. Y. 1013.
54. *Marasmius androsaceus* (L.) Fr.
A4 Safranbolu, Gürleyik district, on dead twigs of conifer, 825 m, 15.11.1998, A. Y. 1021.
55. **Strobilurus tenacellus* (Pers.) Singer
Eflani, Yağlıca village, on conifer cones, 880 m, 22.05.1999, A.D. 1120.
56. *Xerula radicata* (Relhan) Dörfelt
A4 Safranbolu, Gürleyik district, on or near dead stumps of beech trees, 825 m, 25.10.1998, A. Y. 812.
- Paxillaceae**

A4 Safranbolu, Gürleyik district, on stumps of beech trees, 825 m, 15.11.1998, A. Y. 1024.

Discussion and Conclusion

According to the results obtained, 121 macrofungi were identified, 6 of them belonging to *Ascomycetes* and 115 to *Basidiomycetes*. In comparison with other studies carried out near the study area (Öder, 1986, 1988; Sesli, 1993, 1998; Demirel, 1998, 1999; Afyon et al., 2000; Afyon and Konuk, 2001a, 2001b; Pekşen and Karaca,

2003; Afyon et al., 2004) the macrofungi species of Karabük appear to be fairly similar to those present in the region. This could be because of the similarities in vegetation and climate with the other parts of the western Black Sea region.

This study is the most extensive research in the area regarding the number of taxa and new records given. This might be due to the conditions of the study area, which exhibits many different habitats, such as mixed forests, and humid plants. The percentage of woodland of the research area is more than 65% and these conditions are optimal for the growth of mushrooms.

Russula delica is collected and consumed in İmamlar village of Eskipazar. *Clitocybe geotropa* is collected locally and sold in Safranbolu markets as an edible mushroom. *Lactarius deliciosus* is consumed in the study area. *Morchella esculenta* var. *esculenta* is collected for export.

Fourteen taxa were added to the Turkish macromycota as new records. These are *Limacella illiniata*, *Cortinarius cinnamomeoluteus*, *C. fasciatus*, *C. herbarum*, *Dermocybe carpineti*, *D. semisanguinea*, *Ramaria flavobrunnescens*, *Clitocybe dicolor*, *C. lateritia*, *Collybia cirrhata*, *Cystoderma fallax*, *Mycena laevigata*, *Strobilurus tenacellus* and *Tricholoma fulvum*.

Acknowledgement

We would like to thank to TÜBİTAK (the Scientific and Technical Research Council of Turkey) for supporting this research financially (TBAG-1659).
