Received: 30.10.2000

Accepted: 05.04.2002

Abstract: This paper deals with a floristic study of Karagüney Mountain (Kırıkkale/Turkey). The study was carried out during 1989-1991 and 2500 vascular plant samples were collected. Eight hundred and sixty-eight taxa of 378 genera have been identified. *Fabaceae*, *Asteraceae* and *Poaceae* are the largest families and *Astragalus* L., *Silene* L. and *Salvia* L. are the largest genera in the area. The endemism rate of the area is 13.1%. The classification of the taxa into three main chorological units shows that Irano-Turanian elements are predominant. Threatened categories were proposed for 109 taxa according to IUCN categories.

Key Words: Flora, Karagüney Mountain, Kırıkkale, Turkey

Karagüney Dağı'nın (Kırıkkale) Florası

Özet: Bu makale Karagüney Dağı'nda (Kırıkkale/Türkiye) yapılan floristik bir çalışmayı sunmaktadır. Floristik çalışma, 1989-1991 yılları arasında gerçekleştirilmiş ve 2500 damarlı bitki örneği toplanmıştır. Bu bitkilerin teşhisi ile 378 cinsle ait toplam 868 takson tespit edilmiş, *Fabaceae*, *Asteraceae* ve *Poaceae* sırasıyla en büyük familya, *Astragalus* L., *Silene* L. ve *Salvia* L. ise yine sırasıyla en büyük cinsler olarak belirlenmiştir. Alanın endemizm oranı %13.1'dir. Tespit edilen taksonların fitocoğrafik bölgelere dağılımında İrano-Turanian elementleri baskındır. IUCN tehlike kategorilerine göre 109 taksonun tehlike durumu değerlendirilmiştir.

Anahtar Sözcükler: Flora, Karagüney Dağı, Kırıkkale, Türkiye

Introduction

The study area lies in the Central Anatolian steppe. Davis (1976) places the area in the moderately known category with respect to flora. However, the area has received little attention by botanists. Only one trip to the area by İnal to collect the *Quercus ithaburensis* Decne. specimens recorded in the Flora of Turkey has been done (Hedge & Yaltırık, 1985). On the other hand, particular areas of Turkey, such as the Taurus mountain ranges, Hakkari and Sivas were more intensively examined. Davis (1976) states that these areas are rich in endemic taxa and new species.

Since steppe areas have long been neglected, this study was undertaken to give more attention to steppes and the Kırıkkale region so as to understand their floristic composition and the environmental changes caused by human impact.

Investigated area

The main part of the study area is situated in Kırıkkale province within the A4 square according to the Davis' grid

system (Davis, 1965-1985). The rest of the area is situated in Çankırı province in the A5 square. The area is bounded to the south by the Samsun road, E88, to the north-west by the Kızılırmak River and to the east by the Delice River (Fig. 1). The Karagüney area is dominated by small mountain ranges lying in a SW-NE direction and the highest peak is called Koçubaba (1374 m).

The area is mainly covered by gypsum facies rocks of Oligo-Miocene. In addition to this, some sedimentary and magmatic rocks are present. Mesozoic ophiolite series are the oldest rocks the area and they crop out around Kuru and Yenilli villages. The western parts of the area (Hıdırşeyh and Pazarlık villages) are formed by Eocene sedimentary rocks. Other sedimentary units of the area belong to the Neogene continental rocks. Granites are observed around the Sulakyurt, Alişeyh and Kavak settlement areas. There are some small igneous rock crops around Büyükavşar, Delice and to the south of Delice. The youngest geological unit of the area belongs to Quaternary period alluvium. These units extend through the streambeds (Mayer-Gossner, 1959).

In the area there are five main soil types: red-brown, brown, brown without lime, alluvial and hydromorphic soils (KHT, 1974). The area is mainly covered by the first three types of soil. The Sulakyurt, Koru, Yeşilyazı, Cingeyli, Tokuş Dağı and Irmakkaralısı settlements are covered by red-brown soil, which covers the largest part of the area. The vegetation of this area is dominated by *Quercus* L. scrub and open steppe. The Balışeyh, Beşbiçak, Koru, Evliyali, Güvendik, Akkuzulu, and Akkuyu settlements are covered by brown soils. These localities are used as fields. Pazarcık, Faraşlı and Sarıkızlı villages have small extensions of brown soil without lime. The Kızılırmak and Delice rivers and their environs, forming a narrow belt, have alluvial soils. These areas are used as fields or grazing lands. In the region of İzzettin, Büyükavşar and Irmakkaralısı hydromorphic soil is present in small extensions.

Meteorological data are only available from one station in the area obtained between 1962 and 1991 in Kırıkkale (775 m) (MİGM, 2000). The mean annual temperature is 12.2 °C and precipitation is 384 mm. The values of "M" and "m" of the hottest and coldest months were calculated to be 18.4 °C and -2.4 °C respectively (Yurdakulol et al., 1990). The dry period is between the end of May and the end of October. The coldest month is January with a mean temperature of -0.1 °C. With respect to Emberger's climatic divisions modified for Turkey by Akman (1990), the area belongs to the Mediterranean zone, with semi-xeric winters.

Vegetation outline

The study area is covered by fields, open steppes, and *Quercus* scrub. The largest part of the area is covered by fields surrounding Karagüney Mountain. The altitude of the largest area ranges from 650 to 950 m but in some places it reaches 1200 m. Crop plants are dominated by *Triticum aestivum* L., *Hordeum vulgare* L., *Helianthus annuus* L., *Beta vulgaris* L., *Citrullus lanatus* (Thunb.) Matsum. et Nakai, *Cucumis melo* L. and other cultivated plants. Fields in the study area play host to a wide variety of weeds and other therophytes such as *Boreava orientalis* Jaub. et Spach, *Wiedemannia orientalis* Fisch. et C.A.Mey., *Ranunculus arvensis* L., *Holosteum umbellatum* Vill., *Arabis nova* Vill., *Portulaca oleracea* L., *Secale cereale* L. and *Anethum graveolens* L. Another part of the study area lies between the fields and the upper parts of Karagüney Mountain. The elevation of this area ranges from 900 to 1300 m and is covered by

steppes which can be divided into two groups: grass steppes and tragacanthic steppes. *Festuca valesiaca*, *Aegilops* L. spp., *Bromus* L. spp., *Taeniatherum caput-medusae* (L.) Nevski subsp. *crinitum* (Schreb.) Melderis, *Cynodon dactylon* (L.) Pers. var. *villosus* Regel, *Koeleria cristata* (L.) Pers., *Lolium perenne* L. and other grasses are the dominant elements of the grass steppes. The grass steppes also include some dicotyledoneous plants such as *Astragalus xylobasis* Freyn et Bornm. var. *angustus* (Freyn & Sint.) Freyn et Bornm., *Vicia sativa* L. subsp. *nigra* (L.) Ehrh., *Reseda lutea* L. var. *lutea*, *Polygala pruinosa* Boiss. subsp. *pruinosa*, *Helianthemum canum* (L.) Baumg., *Fumana aciphylla* Boiss. and others. On the other hand, the tragacanthic steppes are mainly composed of *Astragalus microcephalus* Willd., *A. plumosus* Willd. var. *plumosus* and *A. strictifolius* Boiss. var. *kutepovii* Sirj. Stands of these communities can be seen in the Koçubaba, Sulakyurt, Büyükavşar and Kavak regions. While *Acantholimon acaesum* (Willd.) Boiss. var. *acaesum* forms associations in Koçubaba town, *A. caesareum* Boiss. et Bal. forms associations around Ambardere village. The rest of the area is located in the highest part of Karagüney Mountain at an elevation of 1100-1374 m and it is covered by *Quercus pubescens* Willd. and *Quercus cerris* L. var. *cerris*. This oak scrub includes some shrubs such as *Prunus cocomilia* Ten., *Juniperus oxycedrus* L., *Pyrus elaeagnifolia* Pallas, *Cotoneaster nummularia* Fisch. et C.A.Mey., *Amelanchier rotundifolia* (Lam.) Dum.-Cours., *Rosa canina* L., *Crataegus orientalis* Pallas ex M.Bieb., and *Jasminum fruticans* L. The highest part of the area is interrupted by plantations of *Pinus nigra* Arn. The herb layer of the scrub includes *Astragalus vulnerariae* DC., *Globularia trichosantha* Fisch. et C.A.Mey., *Carex* L. spp. *Poa alpina* L. subsp. *fallax* F.Hermann and some other plants.

There are a lot of wet places fed by underground water or springs characterised by a different vegetation mainly including grasses such as *Glyceria plicata* (Fr.) Fr., *Poa trivialis* L., *Phleum montanum* K.Koch subsp. *montanum*, *Carex* spp., and some dicotyledoneous plants such as *Epilobium angustifolium* L., *Veronica anagallis-aquatica* L., *Cirsium arvense* (L.) Scop. subsp. *vestitum* (Wimmer & Grab.) Petr. A few small streams formed by the melting snows originate from higher levels of Karagüney Mountain. These streams join the Kızılırmak and Delice rivers and the Çoruh stream.

Materials and Methods

Many botanical trips were made to the area from 1989 to 1991. The field works resulted in the collection of 2500 vascular plants. These specimens were identified basically using the Flora of Turkey (Davis, 1965-1985; Davis et al, 1988; Güner et al, 2000) and other floristic books (Tutin et al, 1964-1979; Pignatti, 1982; Townsend et al, 1968; Townsend & Guest, 1968-1985; Komarov, 1948; Rechinger, 1966; Meikle, 1977-1985; Zohary, 1966-1986). The floristic list includes natural, naturalised, alien and widely cultivated plants in the region. Cultivated plants are indicated by an asterisk and they are not considered in the endemism ratio. Taxonomic data are presented in alphabetical order. Author abbreviations follow Brummitt & Powell (1992).

Threatened categories are proposed for endemic and some non-endemic taxa according to IUCN risk categories (IUCN, 2001). The reasons for these threats are discussed after the taxa. Phytogeographical regions of the taxa were evaluated according to Davis (1965) and Takhtajan (1986), but mainly Davis' records are taken into consideration. Abbreviations used in the text are as follows: AAD: Ali A. Dönmez; AG: Adil Güner (a field trip carried out on June 2-3, 1990 was supervised by Güner); B: Cihan Bircan (a few samples were collected from the Büyükavşar town area by C. Bircan); En.: endemic; LC: least concern; VU: vulnerable; EN: endangered; CR: critically endangered; Ir.-Tur.: Irano-Turanian element, Medit.: Mediterranean element; Euro-Sib.: Euro-Siberian element. At least one sample for each taxon is deposited at HUB, and duplicates were given to E, K, GAZI and ANK.

Results and Discussion

The identification of 2500 vascular plant specimens collected in this study revealed 868 taxa belonging to 378 genera present in the area. A summary of the statistics is presented in Table 1. The largest families in the area are *Fabaceae* (102 species), *Asteraceae* (99 sp.), *Poaceae* (72 sp.), *Lamiaceae* (54 sp.) and *Brassicaceae* (44 sp.). According to the statistical analysis of Turkish flora (Davis & Tan, 1988) *Asteraceae* is the largest family followed by *Fabaceae*. However, in the present floristic study the opposite has been recorded. The worldwide distribution of these two families shows that they have a similar distribution pattern (Heywood, 1978). Both families are very common in Turkey. Therefore, the disagreement between Davis & Tan's and my views are not related to the distribution pattern of these families. This contradiction would depend on the habitats of the area. Fields cover larger areas in the region and they play host to annual plants. *Fabaceae* have 102 species and the annuals (44 species) to perennials (+biennial- 58 sp.) ratio is 0.76 while *Asteraceae* have 99 species and the annuals (33 sp.) to perennials (+biennial- 66 sp.) ratio is 0.50. Some genera (*Trigonella* L., *Lathyrus* L., *Vicia* L. etc.) of the *Fabaceae* are dominated by annual species. The high ratio of annual to perennials (+biennials) of the *Fabaceae* supports this proposal and the number of annual species of the *Fabaceae* are nearly double that of the *Asteraceae*. When the results of this study are compared with those of other floristic studies (Ekim & Düzenli, 1983; Erik, 1994; Erik, 1999; Hamzaoğlu, 1998) with respect to the largeness of the families, some similarities can be seen (Table 2). The largest genera are *Astragalus* L. (27 sp.), *Silene* L. (14 sp.), *Salvia* L. (12 sp.), *Trigonella* L. (11 sp.) and *Centaurea* L. (9 sp.) respectively on Karagüney Mountain. However, in the

| Systematic Unit | Families | Genera | Species | Subsp. | Varieties | Taxa | Endemics |
|-----------------|----------|--------|---------|--------|-----------|------|----------|
| Pteridophyta | 2 | 2 | 2 | - | - | 2 | - |
| Spermatophyta | 84 | 376 | 845 | 19 | 4 | 866 | 106 |
| Gymnospermae | 3 | 4 | 5 | - | - | 5 | - |
| Angiospermae | 81 | 372 | 838 | 19 | 4 | 861 | 106 |

statistical analysis of the Flora of Turkey *Astragalus* is given as the first genus while *Verbascum* L., *Centaurea* L. and *Allium* L. are given as the second, third and fourth genera respectively. These genera have more perennial species than annual ones. Therefore, fields are not suitable habitats for these genera and their representatives are rare in the study area.

In the study area, 106 taxa are endemic to Turkey and the ratio of endemism is 13.1%. As the majority of the area is covered by fields, most of the endemic taxa grow in the steppe and scrubs. Therefore, the steppes seem to be of more importance for the conservation of these endemic taxa.

Pinus nigra is widely planted in Pazarcık village, Özdere region, Koçubaba town and Büyükyazlı town and around the Delice town area. These areas support many endemic steppe species of Central Anatolia. Despite government legislation to protect the forest and its environs, field areas are mainly expanding into steppe borders illegally. Human activities unfortunately, have left disturbed steppes in the area.

A total of 109 taxa, all endemics, and 29 non-endemics were evaluated according to IUCN risk categories. The results are summarised in Table 3. Ninety-nine taxa are placed in the least concern categories, while 7 taxa are put in the vulnerable category, and 3 in the endangered. Threats to the taxa in the endangered category are discussed under the related taxa. On the other hand, the main problems for the taxa included in the least concern and vulnerable categories are clearing and over-grazing on the steppe. An updated version of the Red Data Book for the vascular plants of Turkey was published by Ekim et al. (2000). There are some disagreements between the authors of that book and the present study on the evaluation of the risk categories for some taxa. This is because they have considered the Turkish flora as a whole; while my

observations are based only on the study area. Meanwhile, further floristic studies in Turkish flora would contribute more to the Red Data Book in the future. Another reason disagreement is that they have used the criteria of IUCN 1994. However, new criteria have been used in this paper.

An evaluation of the taxa with respect to phytogeographical regions shows the following origins, Irano-Turanian-194 (60 endemics) taxa, Mediterranean-54 (2 endemics) taxa and Euro-Siberian-51 (3 endemics) taxa (Table 4). The rest of the taxa are either cosmopolitan or phytogeographically unknown. The dominance of the Irano-Turanian elements would be expected because the study area lies in the Irano-Turanian region. Similar results were obtained from other floristic studies in Central Anatolia close to Karagüney Mountain. The Irano-Turanian elements seem to be dominant in all areas studied while the Euro-Siberian elements come second in all these areas except Karagüney Mountain. The secondary dominance of the Mediterranean elements can be attributed to the lower altitude and warmer climatic conditions around the Delice River. It is interesting that although the study area is closer to the Euro-Siberian region geographically, the number of Mediterranean elements is higher than that of Euro-Siberian elements. This can be explained by the fact that the area is situated in the Mediterranean climatic zone (Akman, 1990). Thus, more Mediterranean elements which are mostly xeric can be expected. The Euro-Siberian elements, however, are cosmopolitan and they mainly thrive either in wet areas of the steppe or in shady places of the *Quercus* scrub.

Acknowledgements

I would like to thank Prof. Dr. Adil Güner (my supervisor) for his help and advice during the floristic study. My thanks go to Prof. Dr. Musa Doğan for checking the identification of *Poaceae* samples.

APPENDIX

The Floristic List

PTERIDOPHYTA

ATHYRIACEAE

Cystopteris fragilis (L.) Bernh.

Sulakyurt, Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 10 viii 1989, AAD 1758.

This species grows in shady places and under *Quercus* scrub.

EQUISETACEAE

Equisetum fluviatile L.

Koçubaba, garden, 1100-1200 m, 23 ix 1990, AAD 1539.

SPERMATOPHYTA

GYMNOSPERMAE

CUPRESSACEAE

**Cupressus sempervirens* L.

Balışeyh, around the city, hedge, 600 m, 17 x 1993, AAD 3402.

Medit.

Juniperus oxycedrus L. subsp. *oxycedrus*

Özdere *Pinus nigra* plantation area, in mixed *Quercus* scrub, 1100 m, 12 v 1990, AAD 1772. İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 2363. Şarklı, steppe, limestone, 850 m, 23 vi 1990, AAD 2096.

J. excelsa M.Bieb.

Şarklı, empty places in *Quercus* scrub, limestone, 900 m, 26 v 1990, AAD 2093. Şarklı, steppe, limestone, 850 m, 26 v 1990, AAD 2138.

EPHEDRACEAE

Ephedra major Host

Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2762.

PINACEAE

Pinus nigra Arn. subsp. *pallasiana* (Lamb.) Holmboe

Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2759. Özdere *Pinus nigra* plantation area, in mixed *Quercus* scrub, 1100 m, 12 v 1990, AAD 1771.

ANGIOSPERMAE

DICOTYLEDONES

ACANTHACEAE

Acanthus hirsutus Boiss.

Hıdırşeyh, steppe areas between fields, 1000 m, 18 vi 1990, AAD 2261-AG.

En.-LC.

ACERACEAE

**Acer negundo* L.

Balışeyh, around the city, hedge, 600 m, 17 x 1993, AAD 4025.

AMARANTHACEAE

Amaranthus retroflexus L.

Koçubaba, fields, 1100-1200 m, 23 ix 1990, AAD 2717.

ANACARDIACEAE

Pistacia atlantica Desf.

Hıdırşeyh, 1000 m, steppe areas, field margin, 2 vi 1990, AAD 2206-AG.

P. terebinthus L. subsp. *palaestina* (Boiss.) Engl.

Delice, around the city, steppe areas between fields, 650 m, 18 v 1989, AAD 1197.

Medit.

Rhus coriaria L.

Dağobası, steppe areas between *Quercus* scrub, 900-1100 m, 23 ix 1990, AAD 2832.

APIACEAE

Actinolema macrolema Boiss.

İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 2383-AG.

Ir.-Tur.

Anethum graveolens L.

Koçubaba, garden, 1100-1200 m, 23 ix 1990, AAD 2712.

Anthriscus nemorosa (Bieb.) Sprengel

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 1939.

Artemisia squamata L.

Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1856. Hıdırşeyh, steppe areas, 1000 m, 2 vi 1990, AAD 2209-AG.

Berula erecta (Huds.) Coville

Koçubaba, gardens, and fields, 1100-1200 m, 23 ix 1990, AAD 1520.

Bifora radians M.Bieb.

Delice, around the city, fallow fields, sandy places, 650 m, 18 v 1989, AAD 1853. İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 2424.

Bunium microcarpum (Boiss.) Freyn subsp. *microcarpum*

İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 2390.

Medit.

Bupleurum cappadocicum Boiss.

Şarklı, empty places in *Quercus* scrub, limestone, 900 m, 26 vi 1990, AAD 2113.

B. rotundifolium L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 2731.

B. sulphureum Boiss. et Bal.

Akkuzulu, in mixed *Quercus* scrub, steppe, 850-1100 m, 17 vi 1990, AAD 1976. Pazarlık, steppe areas between fields, 900-1100 m, 2 vi 1990, AAD 2521.

En.-LC, Ir.-Tur.

B. turcicum Snogerup

Büyükyazlı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2603. Kavak to Gözükızıllı, steppe, 740 m, 3 vi 1990, AAD 2783.

En.-LC, Ir.-Tur.

The species is rare in the area and its habitats are under pressure from over-grazing.

Caucalis platycarpus L.

Sulakyurt, Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 12 v 1990, AAD 2012.

Daucus carota L.

Evlialı to Güvendik, steppe areas between fields, 750-1000 m, 3 vi 1990, AAD 2785. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1525.

Echinophora tournefortii Jaub. et Spach

İmirli to Cingeyli, in *Quercus* scrub, 900-1100 m, 10 viii 1989, AAD 1431. Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2773.

Ir.-Tur.

E. tenuifolia L. subsp. *sibthorpiana* (Guss.) Tutin

Evlialı to Güvendik, steppe areas between fields, 750-1000 m, 5 viii 1990, AAD 2787.

Ir.-Tur.

Eryngium billardieri Delar.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 2687.

Ir.-Tur.

Er. campestre L. var. *virens* Link

Dağobası, steppe areas between *Quercus* scrub, 900-1100 m, 23 ix 1990, AAD 2825.

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1527.

Falcaria vulgaris Bernh.

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1515.

Ferulago pauciradiata Boiss. et Heldr.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 2736.

En.-LC.

F. platycarpa Boiss. et Bal.

Büyükavşar, Ziyaret region, *Pinus nigra* plantation area, 1150 m, 16 vi 1990, B 1430!

En.-LC, Ir.-Tur.

Two *Ferulago* species grow only in steppe areas near fields. Their habitats are under threat due to the enlargement of fields and over-grazing.

Malabaila secacul Banks et Sol.

Yeniceli to Ağaylı, steppe, 800 m, 17 vi 1990, AAD 2461.

Opopanax hispidus (Friv.) Gris.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 2671.

Pastinaca sativa L. subsp. *urens* (Req. ex Godr.) Celak

Koçubaba, garden, 1100-1200 m, 23 ix 1990, AAD 1537.

Peucedanum palimbioides Boiss.

Sulakyurt, Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 12 v 1990, AAD 2017. Gözükızıllı to Hacıobası, steppe areas between fields, 710 m, 24 vi 1990, AAD 2326.

En.-LC, Ir.-Tur.

***Pimpinella anisum** L.

Koçubaba, garden, 1100-1200 m, 23 ix 1990, AAD 2689b.

Scandix pecten-veneris L.

Yeşilyazı, streamside, meadows, 800 m, 8 iv 1989, AAD 1067. İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 1678.

S. stellata Banks et Sol.

Delice, around the Delice river, sandy places, 600 m, 10 viii 1989, AAD 1939. Şarklı, steppe, limestone, 850 m, 23 vi 1990, AAD 2142.

Seseli tortuosum L.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 1448.

The specimens have variations in the colour of their vegetative parts. While some specimens are light green, others are dull purplish.

Torilis japonica (Houtt.) DC.

Koçubaba, garden, and fields, 1100-1200 m, 23 ix 1990, AAD 1486.

T. leptophylla (L.) Reichb.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 1485. Pazarçık, steppe areas between fields, 900-1100 m, 2 vi 1990, AAD 2185.

Turgenia latifolia (L.) Hoffm.

Delice, around the city, fallow fields, sandy places, 650 m, 29 iv 1989, AAD 1849.

Zosima absinthifolia (Vent.) Link

Koçubaba, mixed *Quercus* forest, 1300-1370 m 30 iv 1989, AAD 2662. Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1196.

APOCYNACEAE

Trachomitum venetum (L.) Woodson subsp. *sarmatiense* (Woodson) Avet.

Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2748.

Medit.

Vinca herbacea Waldst. et Kit.

Yeşilyazı, streamside, meadows, 800 m, 8 iv 1989, AAD 1047. Çankırı: Irmakaralısı, steppe areas between fields, 800 m, 31 iii 1990, AAD 1712.

ARISTOLOCHACEAE

Aristolochia maurorum L.

Akkuyu, steppe areas between fields, 1100 m, 10 viii 1989, AAD 1038. Sulakyurt, around the city, in *Quercus* scrub, 800-1100 m, 25 vii 1990, AAD 1767.

Ir.-Tur.

ASCLEPIADACEAE

Cynanchum acutum L. subsp. *acutum*

Evlialı to Güvendik, steppe areas between fields, 750-1000 m, 5 viii 1990, AAD 1616. Karaköseli, steppe areas between fields, 800 m, 10 viii 1989, AAD 2743.

Vincetoxicum canescens (Willd.) Decne. subsp. *canescens*

Gözükızıllı to Hacıobası, steppe areas between fields. 710 m, 24 vi 1990, AAD 2578.

Ir.-Tur.

V. fuscatum (Hornem.) Reichb. subsp. *fuscatum*

İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 2414. Şarklı, steppe, limestone, 850 m, 23 vi 1990, AAD 2094.

ASTERACEAE

Achillea arabica Kotschy (Valant-Vetschera, 1999).

Büyükyağlı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2593.

A. cappadocica Hausskn. et Bornm.

İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 1791-AG.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1930.

C. kırikkaleensis Dönmez & Güner

Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2753.

En.-EN, Ir.-Tur.

The species is known only from the type collection in the area (Dönmez & Güner 1994). The species forms small populations and it is also known from two localities outside of the study area. The habitats of the species are under threat of field opening and over-grazing. The species would become extinct in the near future. Luckily, however, the seeds of the species were given to the gene bank in İzmir.

C. lyrata Lam. subsp. *lyrata*

Yeniceli to Ağaylı, in *Quercus* scrub, 1000 m, 17 vi 1990, AAD 2480, Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1932.

***Citrullus lanatus** (Thunb.) Matsum. et Nakai

İmirli to Cingeyli, in *Quercus* scrub, 900-1100 m, 10 viii 1989, AAD 4030.

***Cucurbita pepo** L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 2701.

***Cucumis melo** L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 2706.

***C. sativus** L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 2708.

Ecballium elaterium (L.) A.Rich.

Çatalelma to Kiyıkavurgalı, steppe areas between fields, 700 m, 10 viii 1989, AAD 1606.

CUSCUTACEAE**Cuscuta approximata** Bab. var. *approximata*

Gözükızılı to Hacıobası, steppe areas between fields, 710 m, 24 vi 1990, AAD 2580. Koçubaba, garden, 1100-1200 m, 23 ix 1990, AAD 2709.

This species grows on *Genista sessilifolia*, *Prunus cocomilia* and *Helichrysum arenarium* subsp. *aucheri*.

C. campestris Yuncker

Çankırı: İrmakaralısı, steppe areas between fields, 800 m, 23 iii 1990, AAD 2492.

This species grows on *Malva sylvestris*.

C. monogyna Vahl subsp. *monogyna*

Kavak to Gözükızılı, steppe, 740 m, 5 viii 1990, AAD 1782.

This species mainly grows on *Vitis vinifera* and rarely on *Quercus* spp. This parasitic plant is harmful to vineyards in the area.

C. palaestina Boiss. subsp. **balansae** (Yuncker) Plitmann

Yeniceli to Ağaylı, steppe, 800 m, 17 vi 1990, AAD 2481. Çankırı: Irmakaralısı, marshy places, 700 m, 23 vi 1990, AAD 2500.

This species grows on the *Alyssum sibiricum*, *Fumana aciphylla*, *Phlomis armena* and *Thymus sipyleus*.

C. planiflora Ten.

Şarklı, empty places in *Quercus* scrub, limestone, 900 m, 26 vi 1990, AAD 2544.

This species grows on *Astragalus spruneri*.

DIPSACACEAE

Dipsacus laciniatus L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 1578.

Pterocephalus plumosus (L.) Coult.

Şarklı, steppe, limestone, 850 m, 23 vi 1990, AAD 2513. Hıdırşeyh, 1000 m, steppe areas, field margin, 2 vi 1990, AAD 2212.

Scabiosa argentea L.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 2728. Koçubaba, gardens and fields, 1100-1200 m, 26 iii 1989, AAD 1542.

S. micrantha Desf.

Şarklı, steppe, limestone, 850 m, 26 v 1990, AAD 2510.

S. rotata M.Bieb.

Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1293.

GERANIACEAE

Erodium acaule (L.) Bech. et Thell.

Şarklı, empty places in *Quercus* scrub, limestone, 900 m, 26 v 1990, AAD 1679. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 1120.

Medit.

E. ciconium (L.) L'Hér.

İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 2332-AG.

E. cicutarium (L.) L'Hér. subsp. cicutarium

Şarklı, steppe, limestone, 850 m, 26 v 1990, AAD 2059. Delice, around the city, fallow fields, sandy places, 650 m, 29 iv 1989, AAD 1150.

Geranium rotundifolium L.

Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 12 v 1990, AAD 2087. Ambardere, steppe areas between fields, 1100 m, 2 vi 1990, AAD 2311.

G. tuberosum L. subsp. tuberosum

Akkuyu, steppe areas between fields, 1100 m, 10 viii 1989, AAD 1049. Koçubaba, gardens and fields, 1100-1200 m, 26 iii 1989, AAD 1108.

GENTIANACEAE

Centaurium erythraea Rafn subsp. turcicum (Velen.) Melderis

Büyükyığı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2591.

Medit.

C. pulchellum (Sw.) Druce

Koru, steppe areas between *Quercus* scrub clearings, 650 m, 17 vi 1990, AAD 1614.

C. spicatum (L.) Fritsch

Koru, steppe areas between *Quercus* scrub clearings, 650 m, 17 vi 1990, AAD 1613.

GLOBULARIACEAE

Globularia orientalis L.

Gözükızıllı to Hacıobası, steppe areas between fields. 710 m, 3 vii 1990, AAD 2575.

Ir.-Tur.

An albino population of the species was observed in the Delice region.

G. trichosantha Fisch. et C.A.Mey.

Akkuyu, steppe areas between fields, 1100 m, 10 iii 1989, AAD 1050. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1476.

HYPERICACEAE

Hypericum adenotrichum Spach

Hıdırşeyh, 1000 m, steppe areas, field margin, 2 vi 1990, AAD 2290-AG.

En.-LC

H. lydium Boiss.

Delice, around the city, steppe areas between fields, 650 m, 18 v 1989, AAD 1295. Hıdırşeyh, 1000 m, steppe areas, 2 vi 1990, AAD 2292. Özdere *Pinus nigra* plantation area, in mixed *Quercus* scrub, 1100 m, 12 v 1990, AAD 2040.

Ir.-Tur.

H. perforatum L.

Şarklı, steppe, limestone, 850 m, 23 vi 1990, AAD 2558. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1423.

H. scabrum L.

Şarklı, steppe, limestone, 850 m, 23 vi 1990, AAD 2121. Delice, around the city, fallow fields, sandy places, 650 m, 18 v 1989, AAD 1311.

Ir.-Tur.

H. triquetrifolium Turra

Büyükyığı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2728.

ILLECEBRACEAE

Herniaria glabra L.

Hıdırşeyh, 1000 m, steppe areas, field margin, 2 vi 1990, AAD 2283-AG.

H. incana Lam.

İmirli to Cingeyli, steppe, 900-1100 m, 3 vi 1990, AAD 2344-AG.

Paronychia kurdica Boiss. subsp. kurdica var. kurdica

Delice, around the city, steppe areas between fields, 650 m, 18 v 1989, AAD 1233. Akkuzulu, in mixed *Quercus* scrub, 850-1100 m, 17 vi 1990, AAD 1985.

Scleranthus annuus L. subsp. annuus

İmirli to Cingeyli, steppe, 900-1100 m, 3 vi 1990, AAD 2361-AG.

LAMIACEAE

Acinos rotundifolius Pers.

Özdere *Pinus nigra* plantation area, in mixed *Quercus* scrub, 1100 m, 12 v 1990, AAD 1889.

Ajuga chamaepitys (L.) Schreb. subsp. chia (Schreb.) Arcang. var. chia

Delice, around the city, fallow fields, sandy places, 650 m, 29 iv 1989, AAD 1227.

A. salicifolia (L.) Schreb.

İmirli to Cingeyli, steppe, 900-1100 m, 3 vi 1990, AAD 2373.AG.

Ir.-Tur.

Ballota nigra L. subsp. **anatolica** P.H.Davis

Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 10 viii 1989, AAD 2811.

En.-LC, Ir.-Tur.

Clinopodium vulgare L. subsp. **arundanum** (Boiss.) Nyman

Samsun road to Şarklı, steppe, limestone, 800 m, 26 v 1990, AAD 2412. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 2647.

Lallemantia iberica (M.Bieb.) Fisch. et C.A.Mey.

Akkuzulu, in mixed *Quercus* scrub, steppe, 850-1100 m, 17 vi 1990, AAD 2004.

Ir.-Tur.

Lamium amplexicaule L.

Koru, steppe areas between *Quercus* scrub clearing, 650 m, 25 v 1990, AAD 1649. Yeşilyazi, streamside, meadows, 800 m, 8 iv 1989, AAD 1023.

Euro.-Sib.

L. macrodon Boiss. et Huet

Sulakyurt, around the city, in *Quercus* scrub, 800-1100 m, 25 iii 1990, AAD 1576. Ambardere, steppe areas between fields, 1100 m, 2 vi 1990, AAD 2309.

Ir.-Tur.

Lycopus europaeus L.

Delice, around the city, steppe areas between fields, 650 m, 18 v 1991, AAD 2813.

Euro.-Sib.

Marrubium anisodon K.Koch

Ambardere, steppe areas between fields, 1100 m, 17 viii 1990, AAD 2303.

M. parviflorum Fisch. et C.A.Mey. subsp. **parviflorum**

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1488. Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1427.

Ir.-Tur.

M. parviflorum Fisch. et C.A.Mey. subsp. **oligodon**

Delice, around the city, steppe areas, 650 m, 18 v 1989, AAD 1170, AAD 1890. Gözükızıllı to Hacıobası, steppe areas between fields, 710 m, 3 vi 1990, AAD 2370.

Mentha spicata L. subsp. **tomentosa** (Briq.) Harley

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1342. Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1989, AAD 1503.

Moluccella laevis L.

Karaköseli, steppe areas between fields, 800 m, 10 viii 1990, AAD 2745.

Ir.-Tur.

Nepeta cataria L.

Şarklı, empty places in *Quercus* scrub, limestone, 900 m, 26 v 1990, AAD 2564. Euro.-Sib.

N. nuda L. subsp. **albiflora** (Boiss.) Gams

Yeniceli to Ağaylı, in *Quercus* scrub, 1000 m, 17 vi 1990, AAD 2476.

***Ocimum basilicum** L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1989, AAD 1831b.

Phlomis armeniaca Willd.

İmirli to Cingeyli, steppe areas, 900-1100 m, 3 vi 1990, AAD 2436-AG.

En.-LC, Ir.-Tur.

P. pungens Willd. var. **pungens**

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1697.

Prunella laciniata (L.) L.

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1909.

Euro.-Sib.

Salvia aethiopsis L.

Hıdırşeyh, 1000 m, steppe areas, field margin, 2 vi 1990, AAD 2289-AG.

S. bracteata Banks et Sol.

Faraşlı to Kalekişla, in *Quercus* scrub, 1200 m, 10 viii 1989, AAD 2091.

Ir.-Tur.

S. caespitosa Montbret et Aucher ex Benth.

Şarklı, steppe, limestone, 850 m, 23 vi 1990, AAD 2538.

En.-LC, Ir.-Tur.

S. ceratophylla L.

Delice, around the city, steppe areas between fields, 650 m, 18 v 1989, AAD 1891.

Ir.-Tur.

S. cryptantha Montbret et Aucher ex Benth.

Akkuyu, steppe areas between fields, 1100 m, 10 viii 1989, AAD 1083. Çankırı: İrmakaralısı, marshy places, 700 m, 23 vi 1990, AAD 1710.

En.-LC, Ir.-Tur.

S. cyanescens Boiss. et Bal.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 2693.

Althaea officinalis L.

Çatalelma to Kıyıkavurgalı, steppe areas between fields, 700 m, 10 viii 1989, AAD 1593.

Alcea pallida Waldst. et Kit.

Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 10 viii 1989, AAD 2809.

**Hibiscus esculentus* L.

Sulakyurt, around the city, in *Quercus* scrub, 800-1100 m, 25 viii 1990, AAD 2823.

Malva neglecta Wallr.

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1404. Özdere *Pinus nigra* plantation area, in mixed *Quercus* scrub, 1100 m, 12 v 1990, AAD 2085.

M. sylvestris L.

Çankırı: Irmakaralısı, marshy places, 700 m, 23 vi 1990, AAD 2491.

MORACEAE

**Morus alba* L.

Çankırı: Irmakaralısı, marshy places, 700 m, 23 viii 1990, AAD 2502.

MORINACEAE

Morina persica L.

Şarklı, steppe, limestone, 850 m, 23 vi 1990, AAD 2109.

OLEACEAE

**Fraxinus angustifolia* Vahl subsp. *angustifolia*

Balışeyh, around the city, hedge, 600 m, 17 x 1993, AAD 4023.

Jasminum fruticans L.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1379.

**Syringa vulgaris* L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 2681.

ONOGRACEAE

Epilobium angustifolium L.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 2660.

E. hirsutum L.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 1512. Özdere *Pinus nigra* plantation area, in mixed *Quercus* scrub, 1100 m, 12 v 1990, AAD 2796.

E. montanum L.

Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 12 v 1990, AAD 2799.

Euro.-Sib.

E. minutiflorum Hausskn.

Büyükyazlı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2623.

OROBANCHACEAE

Orobanche anatolica Boiss. et Reut.

Akkuzulu, in mixed *Quercus* scrub, steppe, 850-1100 m, 17 vi 1990, AAD 1087.

The specimens were collected near *Quercus* scrub, but no relation to other plants by roots of the parasitic plants was observed.

O. nana Noë ex G.Becker

Şarklı, empty places in *Quercus* scrub, limestone, 900 m, 26 vi 1990, AAD 2123.

O. cernua Loefl.

Sulakyurt, around the city, in *Quercus* scrub, 800-1100 m, 25 iii 1990, AAD 2078.

The plant grows on *Trigonella spicata*.

PAPAVVERACEAE

Fumaria densiflora DC.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 1387. Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1807.

F. officinalis L.

Yeniceli to Ağaylı, steppe, 800 m, 17 vi 1990, AAD 1732. Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1899.

Glaucium corniculatum (L.) Rud. subsp. *corniculatum*

Büyükyazlı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2627. Çankırı: Irmakaralısı, steppe areas between fields, 800 m, 31 iii 1990, AAD 2497. Akkuzulu, in mixed *Quercus* scrub, steppe, 850-1100 m, 17 vi 1990, AAD 1990.

Hypecoum imberbe Sibth. et Sm.

Yeşilyazı, streamside, meadows, 800 m, 8 iv 1989, AAD 1065. Yeniceli to Sarıkızlı, open areas in *Quercus* scrub, 1100 m, 31 iii 1990, AAD 1734.

Papaver argemone L.

Hıdırşeyh, 1000 m, steppe areas, field margin, 2 vi 1990, AAD 2213-AG. Koçubaba, garden, 1100-1200 m, 26 iii 1989, AAD 1180.

P. dubium L.

Şarklı, steppe, limestone, 850 m, 26 v 1990, AAD 2510.

P. macrostomum Boiss. et Huet ex Boiss.

Çankırı: Irmakaralısı, steppe areas between fields, 800 m, 23 iii 1990, AAD 1706.

Ir.-Tur.

Roemeria hybrida (L.) DC. subsp. **hybrida**

Şarklı, steppe, limestone, 850 m, 26 v 1990, AAD 2151.

PLANTAGINACEAE

Plantago major L. subsp. **major**

Koçubaba, gardens and fields, 1100-1200 m, 20 ix 1991, AAD 2827.

P. maritima L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 1950.

P. lanceolata L.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 25 iii 1989, 30 iv 1989, AAD 1507, AAD 1353. Eskiçerikli, fallow fields and steppe areas between fields, 650 m, 18 v 1990, AAD 1815. Samsun road to Şarklı, steppe, limestone, 800 m, 26 v 1990, AAD 2557.

P. scabra Moench

Gözükızılı to Hacıobası, steppe areas between fields. 710 m, 24 vi 1990, AAD 2582.

PLUMBAGINACEAE

Acantholimon acerosum (Willd.) Boiss. var. **acerosum**

Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2761. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1450.

Ir.-Tur.

A. caesareum Boiss. et Bal.

Ambardere, steppe areas between fields, 1100 m, 17 viii 1993, AAD 3949.

En.-LC, Ir.-Tur.

The species was collected only from the given locality. The area is widely used for plantation.

Goniolimon collinum (Griseb.) Boiss.

Akkuzulu, in mixed *Quercus* scrub, steppe, 850-1100 m, 17 vi 1990, AAD 1988. Samsun road to Şarklı, steppe, limestone, 800 m, 26 vi 1990, AAD 2525.

Medit.

Limonium gmelinii (Willd.) O.Kunze

Karaköseli, steppe areas between fields, 800 m, 10 viii 1989, AAD 1586.

Euro.-Sib.

L. liliacinum (Boiss. et Bal.) Wagenitz

Çankırı: Irmakaralısı, marshy places, 700 m, 23 vi 1990, AAD 3942.

En.-LC, Ir.-Tur.

Plumbago europaea L.

Kavak to Gözükızılı, steppe, 740 m, 5 viii 1990, AAD 2780. İmirli to Cingeyli, in *Quercus* scrub, 900-1100 m, 10 viii 1989, AAD 1433.

Euro.-Sib.

POLYGALACEAE

Polygala anatolica Boiss. et Heldr.

Koçubaba, gardens and fields, 1100-1200 m, 26 iii 1989, AAD 1396.

P. pruinosa Boiss. subsp. **pruinosa**

Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1201.

POLYGONACEAE

Atraphaxis billardieri Jaub. et Spach var. **billardieri**

Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2769.

Ir.-Tur.

Polygonum arenastrum Bor

Kırkkale, in the city, empty places, 800 m, 22 ix 1989, AAD 1634 (Leblebici, 1990).

P. aviculare L.

Yeşilyazı, streamside, meadows, 800 m, 8 iv 1989, AAD 1562. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1497.

P. cognatum Meisn.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 1398.

P. convolvulus L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 3211.

P. laphatfolium L.

Yeşilyazı, streamside, meadows, 800 m, 8 iv 1989, AAD 1581.

Euro.-Sib.

Rumex acetosella L.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 1381. Ambardere, steppe areas between fields, 1100 m, 2 vi 1990, AAD 2307-AG.

R. conglomeratus Al.Murray

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1523.

R. crispus L.

Yeniceli to Ağaylı, in *Quercus* scrub, 1000 m, 17 vi 1990, AAD 2460. Delice, around the city, fallow fields, sandy places, 650 m, 18 v 1989, AAD 1998. Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 1969.

PORTULACACEAE

Portulaca oleracea L.

Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 12 v 1990, AAD 2822.

PRIMULACEAE

Anagallis foemina Mill.

Akkuyu, steppe areas between fields, 1100 m, 10 viii 1989, AAD 1583.

Medit.

Androsace maxima L.

Sulakyurt, Ağaylı to Karalı, in *Quercus* scrub, 1000 m, 31 iii 1990, AAD 1651.

Glaux maritima L.

Delice, around the Delice river, sandy places, 600 m, 10 viii 1989, AAD 1870.

This species was collected only from riversides.

RANUNCULACEAE

Adonis aestivalis L. subsp. *aestivalis*

Koru, steppe areas between *Quercus* scrub clearings, 650 m, 25 v 1990, AAD 1187. Akkuzulu, in mixed *Quercus* scrub, steppe, 850-1100 m, 8 iv 1989, AAD 1071.

Ceratocephalus falcatus (L.) Pers.

Deredüzü, steppe, 1000 m, 18 iii 1990, AAD 1663. Koçubaba, mixed *Quercus* forest, 1300 m, 25 iii 1989, AAD 1008. Yenilli, fields, 650 m, 25 iii 1989, AAD 1009.

Clematis orientalis L.

Çatalelma to Kiyıkavurgalı, steppe areas between fields, 700 m, 10 viii 1989, AAD 1588. Delice, around the city, fallow fields, sandy places, 650 m, 29 iv 1989, AAD 1878.

Consolida glandulosa (Boiss. et Huet) Bornm.

Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2766.

En.-LC, Ir.-Tur.

C. orientalis (Gay) Schröd.

Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 2828.

Ir.-Tur.

C. raveyi (Boiss.) Schröd.

Ağaylı to Karalı, in *Quercus* scrub, 1000 m, 17 vi 1990, AAD 2451.

En.-LC, Ir.-Tur.

C. regalis S.F.Gray subsp. *paniculata* (Host) Soó var. *paniculata*

Samsun road to Şarklı, steppe, limestone, 800 m, 26 v 1990, AAD 2523. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1425.

C. thirkeana (Boiss.) Schröd.

Büyükyığılı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2622. Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2778.

En.-LC.

Delphinium venulosum Boiss.

Evlialı to Güvendik, steppe areas between fields, 750-1000 m, 3 vi 1990, AAD 2778. Koçubaba, fields, 1100-1200 m, 23 ix 1990, AAD 1340.

Nigella orientalis L.

Ambardere, steppe areas between fields, 1100 m, 17 viii 1993, AAD 2537.

N. segetalis M.Bieb.

Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1852.

Ranunculus argyreus Boiss.

Hıdırşeyh, steppe areas between fields, 1000 m, 18 iii 1990, AAD 2276.

R. arvensis L.

Akkuzulu, in mixed *Quercus* scrub, steppe, 850-1100 m, 17 vi 1990, AAD 1032. Akkuyu, steppe areas between fields, 1100 m, 10 iii 1989, AAD 1093.

R. constantinopolitanus (DC.) d'Urv.

Koçubaba, meadows, 1100-1200 m, 23 ix 1990, AAD 2003.

R. damascenus Boiss. et Gaill.

Koçubaba, steppe, 1100-1200 m, 23 ix 1990, AAD 1386.

Ir.-Tur.

R. illyricus L. subsp. *tenorii* (D.S.Jord.) P.H.Davis

Hıdırşeyh, steppe areas between fields, 1000 m, 18 iii 1990, AAD 2287. Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1361.

R. isthmicus Boiss. subsp. *stepporum* P.H.Davis

Yeniceli to Sarıkızlı, open areas in *Quercus* scrub, 1100 m, 17 vi 1990, AAD 1742. Delice, around the city, fallow fields, sandy places, 650 m, 29 iv 1989, AAD 1264.

Ir.-Tur.

R. repens L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 1921.

R. trichophyllus Chaix

Çatalelma to Kiyıkavurgalı, steppe areas between fields, 700 m, 25 v 1990, AAD 2049.

RESEDACEAE

Reseda inodora Reichb.

Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1148, AAD 1139.

R. lutea L. var. *lutea*

Koru, steppe areas between *Quercus* scrub clearings 650 m, 17 vi 1989, AAD 1185. Büyükyığılı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2597.

R. orientalis (Müller) Boiss.

Samsun road to Şarklı, steppe, limestone, 800 m, 26 vi 1990, B. Mutlu 5047.

Medit.

RHAMNACEAE

Paliurus spina-christi Mill.

Yeniceli to Sarıkızlı, open areas in *Quercus* scrub, 1100 m, 17 vi 1990, AAD 2457.

Rhamnus rhodopeus Velen.

Ambardere, steppe areas between fields, 1100 m, 2 vi 1990, AAD 2313-AG.

ROSACEAE

Agrimonia eupatoria L.

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1509. Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 2588.

Amelanchier rotundifolia (Lam.) Dum.-Cours. subsp. *integrifolia* (Boiss. et Hohen.) Browicz

Tokuş Mountain, in *Quercus* scrub, 1200-1350 m, 5 viii 1990, AAD 2764.

Medit.

***Amygdalus communis** L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 4529.

Ir.-Tur.

A. orientalis Mill.

Şarklı, empty places in the *Quercus* scrub, limestone, 900 m, 26 v 1990, AAD 2122.

***Armeniaca vulgaris** L.

Evlialı to Güvendik, steppe areas between fields, 750-1000 m, 5 viii 1990, AAD 2322-AG.

***Cerasus avium** (L.) Moench

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 2715.

Cotoneaster nummularia Fisch. et C.A.Mey.
Şarklı, empty places in *Quercus* scrub, limestone, 900 m, 26 vi 1990, AAD 2148. Kavak to Gözükızıllı, steppe, 740 m, 5 viii 1990, AAD 2772.

Crataegus monogyna J.Jacq. subsp. *monogyna*

Delice, around the city, steppe areas between fields, 650 m, 29 iv 1989, AAD 1320. İmirli to Cingeyli, in *Quercus* scrub, 900-1100 m, 10 viii 1989, AAD 1438.

C. orientalis Pallas ex M.Bieb. var. *orientalis*
Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1571.

C. szovitsii Pojark.

Şarklı, empty places in *Quercus* scrub, limestone, 900 m, 26 vi 1990, AAD 2146.

***Cydonia oblonga** Mill.

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 30 iv 1989, AAD 2635.

Filipendula vulgaris Moench

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 2843.

Euro.-Sib.

Geum urbanum L.

Koçubaba, steppe, plantation area, 1100-1300 m, 16 vi 1990, AAD 1923.

Euro.-Sib.

***Malus sylvestris** Mill. subsp. *orientalis* (Uglitzk.) Browicz var. *orientalis*

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 2684.

Potentilla recta L.

Şarklı, steppe, limestone, 850 m, 26 v 1990, 23 vi 1990, AAD 2147. İmirli to Cingeyli, in *Quercus* scrub, 900-1100 m, 10 viii 1989, AAD 2416.

P. supina L.

Akkuyu, steppe areas between fields, 1100 m, 10 viii 1989, AAD 1567. Koçubaba, garden, 1100-1200 m, 23 ix 1990, AAD 1343.

P. reptans L.

Büyükyayağı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1990, AAD 2628.

Prunus cocomilia Ten. (Dönmez & Yıldırım, 2000)

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 25 iii 1989, AAD 1540.

Pr. spinosa L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 4090.

***Pr. x domestica** L.

Şarklı, garden, 700 m, 23 vi 1990, AAD 2560. Koçubaba, garden, 1100-1200 m, 26 iii 1990, AAD 2685, AAD 2675.

***Pyrus communis** L. subsp. *sativa* (DC.) Hegi

Şarklı, garden, 700 m, 23 vi 1990, AAD 2552. Koçubaba, garden, 1100-1200 m, 23 ix 1990, AAD 2682, AAD 2676.

Py. elaeagnifolia Pallas subsp. *elaeagnifolia*

Hıdırşeyh, 1000 m, steppe areas, field margin, 2 vi 1990, AAD 2274-AG.

Py. elaeagnifolia Pallas subsp. *kotschyana* (Boiss.) Browicz

Akkuyu, steppe areas between fields, 1100 m, 10 viii 1989, AAD 1078. İmirli to Cingeyli, steppe areas between fields, 900-1100 m, 3 vi 1990, AAD 2341.

Rosa canina L.

Koçubaba, gardens and fields, 1100-1200 m, 23 ix 1990, AAD 1478.

***R. damascena** Mill.

Koçubaba, garden, 1100-1200 m, 23 ix 1990, AAD 1093.

R. hemisphaerica Herrm.

Delice, around the city, steppe areas between fields, 650 m, 18 v 1989, AAD 1337. Hıdırşeyh, 1000 m, steppe areas, 2 vi 1990, AAD 2231.

Ir.-Tur.

Rubus canescens DC. var. *canescens*

Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 2658. Koçubaba, mixed *Quercus* forest, 1300-1370 m, 10 viii 1989, AAD 1418.

Ru. discolor Weihe et Nees

Faraşlı to Kalekişla, in *Quercus* scrub, 900-1200 m, 12 v 1990, AAD 2812.

Ru. sanctus Schreb.

Sulakyurt, around the city, in *Quercus* scrub, 800-1100 m, 25 iii 1990, AAD 2810.

En.-EN, Ir.-Tur.

No specimen of this species was found despite several trips to the type locality, Afyon, in western Turkey, by the author and other botanists. However, the author came across flowering and fruiting materials of the species in the given locality in Kırıkkale. The seeds were sent to the gene bank in İzmir. After this collection, another specimen collected from Kahramanmaraş by Murat Ekici was examined by the author. In the last two localities the species is represented only by two or three individuals. Therefore, the species may become extinct.

V. caudatum Freyn et Bornm.

Büyükyığı, *Pinus nigra* plantation area, steppe, 1100-1200 m, 3 vii 1991, AAD 3909.
