#### Readdress Population Health

It has been found that there is no capacity to study and resolve the health concerns in medical model. Population health has also been recognized as a new health research field, even if population health was initiated just several years ago in China and international academic society. Based on the data and information from population census and hospital records in diseases and death, the inter-relationship between population changing and health transition was readdressed. In the paper, two new approaches, disease capacity analysis (DCA) and lower - possibility diseases enlargement analysis (DEA), were discussed as methodological hypothesis in population health field.

**Key Words:** Population Health; Non - medical Determinants; Health Capacity

**Author:** Zheng Xiaoying, female, born in 1956, professor and PH.D candidate supervisor of Institute of Population Research at Beijing University.

### 联合国人口基金 CPR/03/06 援华项目在京签署

[本刊讯]在第五次国家方案(2003-2005)——联合国人口基金对中国的援助计划中,人口老龄化及其对政策影响的研究项目(CPR/03/06)协议在京正式签署,项目周期三年。该项目由中国政府和联合国人口基金共同投入,联合国人口基金和国家外经部作为该项目的执行机构,中国国家老龄工作委员会和中国人民大学老年学研究所作为该项目的实施机构。

杜鹏教授代表中国人民大学老年学研究所签署了文本。中国人民大学老年学研究所作为本项目的实施机构,成为国内高校中唯一参与本周期联合国人口基金援华项目的实施机构。
