

THE OCEANOGRAPHY SOCIETY

P.O. Box 1931
Rockville, MD 20849-1931 USA
t: (1) 301-251-7708; f: (1) 301-251-7709
www.tos.org

Oceanography Society was founded in 1988 to disseminate knowledge of oceanography and its application through research and education, to promote communication among oceanographers, and to provide a constituency for consensus-building across all the disciplines of the field.

OFFICERS

Carolyn Thoroughgood, President
Mike Roman, President-Elect
Richard Spinrad, Past-President
Susan Cook, Secretary
Susan Banahan, Treasurer

COUNCILLORS

Alia Benitez-Nelson	Karen Heywood
John Cullen	Charles Nittrouer
L. Donaghay	Lisa Rom
John Doney	

EXECUTIVE DIRECTOR

Jennifer Ramarui (info@tos.org)

There Really Is (A Good) Life Beyond Academia

Beginning with this June issue, *Oceanography* will include “career profiles” of marine scientists who have pursued successful and fulfilling careers outside of academia (see the last couple of pages of this issue). By presenting information that is directed at graduate students, this new feature should fill a gap in the magazine. Presenting career profiles is an idea that arose from informal discussions at the recent Ocean Sciences meeting in Portland, Oregon, which highlighted the need to advise ocean sciences graduate students about career options other than teaching and/or research in a university setting. The Oceanography Society, and *Oceanography* in particular, will do our best to provide that information through the new career profiles feature.

The next steps were to assemble an initial list of scientists to profile and develop a series of questions to ask them. Here are some of those questions:

- Degree: When, where, what, and what in?
- Did you stay in academia at all, and if so, for how long?
- How did you go about searching for a job outside of the university setting?
- Is this the only job (post-academia) that you’ve had? If not, what else did you do?
- What is your current job? What path did you take to get there?
- Is the job satisfying? What aspects of the job do you like best/least?
- What did your oceanographic education (or academic career) give you that is useful in your current job?
- Do you have any recommendations for new grads looking for jobs?

To make this new careers column a success, *Oceanography* readers will need to pitch in—most importantly, with suggestions about who to profile, including their contact information (send to ekappel@geo-prose.com). Finding the right subjects is a challenging task, especially because their contact with academia often has been limited—or perhaps nonexistent—for a long time. The first career profile clearly shows that there IS life—and a good one—outside of academia. I went back to my academic roots to nab a person to submit this initial profile. Please consult your Rolodex, or your iPhone or Blackberry contacts folders and provide *Oceanography* with information about people you know whose career paths might inspire, or at least inform, the next generation.
