Opinion of the Editor-in-Chief

Discussion on the multi-disciplinary dimensional basic problems and methodology systems of macroecosystem science research

Special Features of Landscape Ecology

Construction of ecological network in Qinling Mountains of Shaanxi, China based on MSPA and MCR model

Comprehensive evaluation of the evolution of ecological network structure in Tianjin, China from a multi-dimensional perspective

Evaluation of land ecosystem health in Shaanxi Province, Northwest China based on PSR Model

Conception and framework of land ecological restoration for a new stage in China
Spatial and temporal variations of vegetation coverage in the middle section of Yellow River Basin based on terrain gradient; Taking Yan'an City as an example

Relationship between urban atmospheric environment and surrounding two-dimensional and three-dimensional landscape pattern in China

Landscape ecological risk assessment and influencing factors in ecological conservation area in Sichuan-Yunnan provinces, China

Landscape pattern of built-up land in a typical mining city, Datong, Shanxi, China from 1986 to 2018

Spatiotemporal variations of ecosystem service values and landscape ecological risk and their correlation in forest area of Loess Plateau, China; A case study of Ziwuling region

Research progress on the cascade effect of ecosystem service

Sea-land hydrological connectivity of coastal wetlands based on water salinity and hydrological structure

Effects of small irrigation facilities on hydrological connectivity of ditches in North Jiangsu Plain, China

Original Articles

Seasonal dynamics of energy and nutrients of *Pinus koraiensis* seedlings in different successional stages of broadleaved Korean pine forest in Changbai Mountain, China

Dynamics and influencing factors of stem diameter micro-variations during the growing season in two typical forestation species in the loess hilly region, China

Effects of environment and canopy structure on stem sap flow in a *Larix principis-rupprechtii* plantation

Changes of light response indicators and its impact factors of *Larix principis-rupprechtii* on Saihanba Forest Farm, China

Nitrogen and phosphorus dynamics along the primary succession in the Hailuoguo Glacier retreat area, eastern Tibetan Plateau, China

Changes of nutrient release and enzyme activity during the decomposition of mixed leaf litter of *Larix principis-rupprechtii* and broadleaved tree species

Species-abundance distribution patterns of *Quercus aliena* var. *acutiserrata* forest in Taibai Mountain, China

Root architecture of main tree species and the effects on soil reinforcement in typical black soil region

Responses of the spatial distribution of *Stipa breviflora* to stocking rate at different scales

Characteristics and influence factors in leaf and soil carbon stable isotopes of *Caragana jubata*

Effects of tillage and fertility on soil nitrogen balance and greenhouse gas emissions of wheat-maize rotation system in Central Henan Province, China

Impacts of arbuscular mycorrhizal fungi (AMF) on growth, N bio-fixation, and phosphorus uptake of legume crop

Responses of photosynthesis and P/Fe traits to P application in soybean under stress of low Fe

Effects of different forms of microbial agents on the growth and quality of *Brassica rapa* L. ssp. *chinensis* Makino (non-heading Chinese cabbage)

Responses of root exudates to intercropping of Chinese milk vetch with rape

Effects of *Astragalus sinicus* combined with chemical fertilizer on nitrogen absorption and utilization of rice and nitrogen distribution and residue of *Astragalus sinicus* in rice-soil system

Effects of activated coke on soil properties and growth of two plant species in saline alkali soil in northern Shanxi Province, China

Effects of different nitrogen application rates on dry matter accumulation, distribution and yield of grape under alternate partial root-zone drip irrigation

Effects of salinity on soil bacterial diversity and assembly processes in coastal soils

Compositions and metabolic footprints of soil nematode communities under different alfalfa-crop planting patterns in semi-arid region of the Loess Plateau, Northwest China

Effects of cadmium stress on growth and cadmium enrichment of *Chlorophytum comosum* and *Chlorophytum comosum* var. *variegatum*

Seasonal variations and driving factors of phytoplankton community shift in Datun Lake with long-term stress of arsenic contamination

Effects of dung beetles on decomposition of cattle dung in spring and autumn in a *Seriphidium*-dominated desert, China

Diversity and community characteristics of organic phosphate-mineralizing bacteria in the sea area between Minjiang Estuary to Pingtan

Age and growth characteristic of *Sepia officinalis* in the West Africa based on cuttlebones

Factors influencing beak morphology of *Sthenoteuthis oualimiensis* in the north-west Indian Ocean

Reviews

The suppression effect and mechanism of arbuscular mycorrhizal fungi against plant root rot
